THERMOSYPHON VESSEL

Face Materials

- -----
- <https://www.cosmosseals.com/images/product-images/>

Metal Parts

- thermosyphon shell : carbon steel / SS 304 / SS 316 ,cooling coil :SS 304/SS 316 , empty weight:34 kg(approx)

Secondary Seals

- elastomers

Applications

- -----

Operating Limits

- capacity : 7.5 ltrs, Design Pressure : 10 bar, Hydraulic test pressure : 15 bar, Working Temperature(max): 180 degree C, Heat Transfer area of cooling coil : 0.226 m square, Cooling water flow rate recommended: 1 ltrs/min
